

# The Answers You Need

The most advanced infectious  
disease testing available.

## **XPLORE-PATHO<sup>SM</sup> TEST**

Identifying every known virus,  
bacterium, fungus, and parasite—  
to help patients like you.

[aperiomics.com](http://aperiomics.com)

## Knowledge is Power

Using cutting edge technology, Xplore-PATHO<sup>SM</sup> looks for more than 37,000 microorganisms in a single test.

**No other test can do that.**

Combined with our advanced database and superior data analytics, this means we have the most powerful tool available to identify sources of infection—and help you or your loved one on the road to recovery.

## Don't Waste Time with Older Testing

Other tests only look for a small number of potential pathogens, burdening patients with lost time, wasted money and years of suffering.

For example, common forms of testing technology, such as 16s and PCR, examine only **0.001% of the DNA in a sample**. In fact, 75% of testing like this fails to identify the causes of infection.

But our technology can examine up to **100% of the DNA in a sample**, providing your clinician with more information.

### EFFICIENT AND COST-EFFECTIVE

Since our test allows for the identification of over 37,000 known microorganisms—unlike older methods, which only test for a few microbes at a time—our cost per microbe is far more affordable than any other method.

At Aperionomics,  
we find **answers**  
no one else can.

**Aperionomics Xplore-PATHO<sup>SM</sup> Test** is the most scientifically advanced infection testing available. For chronic or mysterious symptoms, this test can help healthcare providers uncover the specific causes of infections—and deliver a path to better care to their patients.

## How it Works

### 1. SPEAK WITH YOUR HEALTHCARE PROVIDER

Your clinician will choose the best sample type for us to test and provide a testing kit.

### 2. COMPLETE THE ORDER FORM

Fill out the order form, included in the kit, and give it to your clinician.

### 3. RETURN THE KIT

Your clinician will collect your sample and ship it to us (pre-paid). Once we receive your sample we start the testing process to identify over 37,000 microorganisms.

### 4. RECEIVE YOUR RESULTS

We send a full report to your clinician, who interprets the results and determines the best treatment plan. And we are happy to consult with your provider in order to provide a deeper understanding of the report at no additional cost.

## Request a Kit

For more information call **703.229.0406**

You can order testing kits at any time by visiting [aperiomics.com/request-kit](https://aperiomics.com/request-kit)

## Helping Patients Like You

Patients and their loved ones have used Xplore-PATHO<sup>SM</sup> in the face of chronic infections, lingering unexplained pain, wounds that won't heal, and more.

"I suffered for a long time and had to sacrifice a lot for my UTI. I am thankful for the work Aperiomics did to make sure I got the help I needed." – Beth

"If it wasn't for Aperiomics, we never would have known definitively that it was a parasite nor what type of worm it was. Now he's much better and on the right path to finally being healthy again." – John's mother

"Thank you to everyone at Aperiomics for helping us rule out a microbial cause for my dad's condition. Knowing what it wasn't confirmed that he was finally receiving the correct treatment." – Randolph's daughter

"Finally, a pathogen identification tool that works! Aperiomics gave us the actionable starting point to get our patient on a proper treatment plan." – Dr. Guadalupe Zamora

## A Team of Experts

We are experienced clinicians and researchers—specialists in infectious disease, genomics and next-generation sequencing technologies who are passionate about leveraging the power of technology to advance human health and quality of life.

Aperiomics is committed to providing unparalleled insight into the causes of infections, so your health care provider can determine the best possible treatment plan. Our test includes a post-report consultation for your clinician with our team of experts to provide insight, context, and deeper understanding of results.

Aperiomics' Xplore-PATHO<sup>SM</sup> and related services exceed Clinical Laboratory industry standards and GMP medical device quality standards and are performed by Aperiomics, Inc. and/or selected partners. Aperiomics' services are Research Use Only and are not intended for the diagnosis, treatment, or prevention of disease.
